Team Mission

User-first design approach

Key Product Specifications

- Survivable temperature range of 0-70°C
- Maximum speed of carriage is 350 rpm
- Water resistant
- 3 shaker patterns: linear, orbital and double orbital
- Adjustable radius
- Stepper motor driven
- Operated via touch screen
- Uses 12 V Power Supply

Our Design

- Belt driven movement system
- Stainless steel and Aluminum construction for main assembly
- 2 closed loop Nema 17 Stepper Motors
- OD/FI sensor separate
 - OD/FI – Optical Density and Fluorescence Intensity
- Handheld user interface with touch screen
 - Wired and removable from shaker table

Enclosure & Carriage

- Enclosure
 - Easily removable
 - Impact resistance
- Carriage
 - Snap in wells and test tube holders
 - Acrylic plate for ODFI

Movement System

- Belt driven
 - 9mm wide HTD Belts
- Linear rails for center movement to reduce sound
- Stepper Motor
 - Nema 17
 - Closed Loop to track carriage position
 - Water and Thermal Resistant
 - 0.72 Nm torque

Stepper Motors

- Need 350 RPM and 25 mm diameter circular path on carriage vs 12 mm diameter on motor pulley

$$f = 350 \frac{\text{rotations}}{\text{minute}} \cdot \frac{(\pi \cdot 25\text{mm})}{(\pi \cdot 12\text{mm})} = 729.2 \text{ RPM}$$

- Friction coefficient μ between carriage and linear rails estimated at 0.3

$$\tau = F_f \cdot L = \mu m g \cdot L$$

$$\tau = (0.3)(0.549 \text{ kg}) \left(9.81 \frac{\text{m}}{\text{s}^2}\right) \cdot (0.155 \text{ m}) = 0.250 \text{ N} \cdot \text{m}$$

$$\tau > 0.250 \text{ N} \cdot \text{m}$$

Stepper Motors

Needs for motor:

$$f = 729.2 \text{ RPM}$$

$$\tau > 0.250 \text{ N} \cdot \text{m}$$

PULL OUT TORQUE CURVE OF 17E1K-07

OD/FI

■ Design Needs

- Tube and well illumination at a proper OD and FI wavelength
- OD/FI measurements must be accurate within 15%
- Compatibility

■ Final Design

- UV LED emits light at a wavelength of $365nm$
- Sensor package has an idle accuracy of 99%
- Wiring housed within the sensor package

Touch Screen

- Easy to use Touch Screen
 - Resistive Touch Screen
 - Compatible while wearing gloves in lab setting
 - Sensitivity is programmed to search for a range of pressures
 - Color!

Demonstration: Linear Movement

Demonstration: Orbital Movement

Demonstration: Double Orbital Movement

Product Testing

IP-X5 Infiltration Test

Functional Demonstration

OD/FI Test

Key Features

- Handheld remote
 - UI Casing is 7" x 3.5"
 - Human Hand is about 3.5" wide
- Touch Screen
 - User-Friendly Design and Layout

Key Features: Touch Screen Remote

Design Evolution

- Method of mounting housing
 - Initial housing design clipped to the base plate using a groove that was difficult to manufacture
 - Housing mounted using screws
 - CNC vs AWJ

Final housing mount design

Initial housing mount design

Design Evolution

- Mounting of the carriage
 - Initial mounting design was not functional
 - Carriage to carriage mounting

Initial carriage mount design

Final carriage mount design

Design Evolution

- Perf board on Arduino Mega 2560 Rev3 Shield
- Customized PCB with copper-etching method

Future Growth

- Plans to go wireless in the future
 - Remote monitoring
 - Data monitoring
- Wi-Fi Module

Handheld Remote

Wi-fi Module

Cost Summary

- Cost to build one prototype
 - \$608.04
- Cost for a production-scale run of 1000 units
 - Total Cost: \$485,628
 - Material Cost: \$285,628
 - Labor Cost: \$200,000

Cost for a production-scale run
